

5673.0.55.003 - Regional Wage and Salary Earner Statistics, Australia - Data Cubes, 2002-03 (Reissue)

Previous ISSUE Released at 11:30 AM (CANBERRA TIME) 22/02/2006

Summary

About this Release

These data cubes contain various cross-tabulations of the characteristics of wage and salary earners such as age, sex, occupation, wage and salary income and total income for the year 2002-03. They are an addition to the data cubes previously published under the catalogue number 5673.0.55.001. Most of the data in these tables are presented for each Statistical Local Area (SLA) in Australia. These data have been compiled from the Australian Taxation Office's (ATO) Individual Income Tax Return Database and are part of the Australian Bureau of Statistics' (ABS) program to increase the range of regional statistics available, particularly through the use of administrative information from other government agencies.

Explanatory Notes

Table 4 - Data Cubes

Note: the Occupation based data was extracted from the ATO datasets at a later time period than the data on the other characteristics of wage and salary earners. This has resulted in more records having been processed at the time of the second extract and has resulted in higher totals in the occupation data.

Tables 3, 4, 7, 8, 9, 13 and 14 have now been added to those tables already released for the 2002-03 edition of cat. no. 5673.0.55.003
